Extent of CamJam

CamJam app will strictly restrict all camera facility in Various mobile Devices.

CamJam controls portable applications like Facebook, Whatsapp, and any video recording applications. It's not permitted to open and catch advanced video & photos. at the point when its introduced on clients portable.

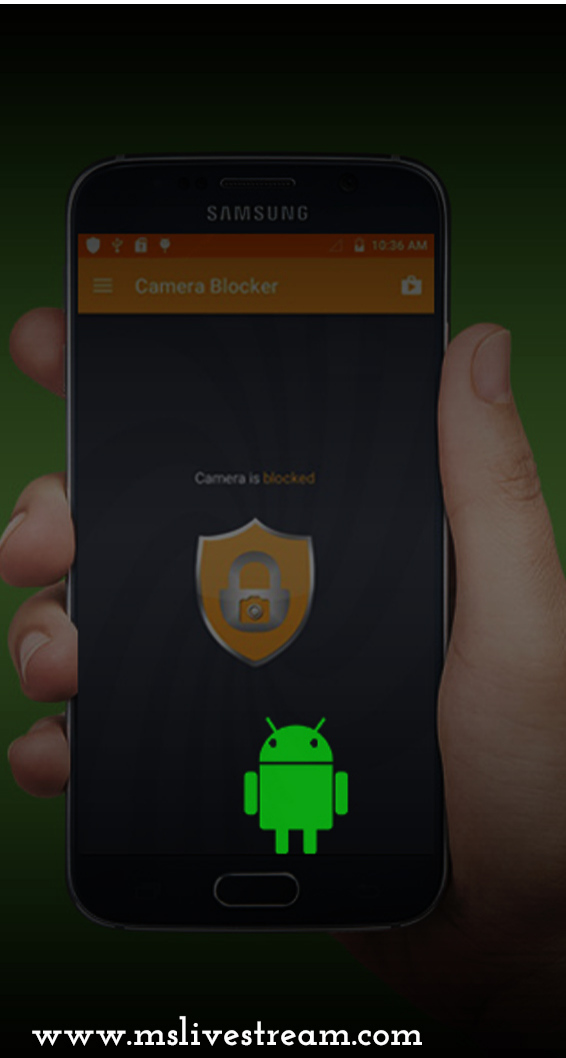

CamJam application is simply Customized application which causes us to confine versatile camera access specifically locale.

GPS Overview- Royal Enfield

This is the RE geographpical view, where camera access is completely restriceted by CamJam app with the help of GPS.

App Development Environment

Android SDK & Google API

Java & Android Studio 3.0

Supports Lollipop 5.0 to Android latest OS

Process Stream

CamJam is easy to understand and it can be downloaded from Google play store. Clients ought to have introduced CamJam on their versatile.

GPS inside empowered after establishment. CamJam inside approves whether it is Royal Enfield locale. When it's affirmed it will cripple the camera and send the dynamic and latent Status the answer to RE administrator.

Staff versatile camera dynamic and latent status report will be coordinated with the IT application possessed by RE.

All prepared database will be approved by RE worker database.

Advantages

Camera gets crippled consequently when staff goes into RE district zone.

Staff status refreshed consequently.

Every 15mins dynamic and idle portable camera status caution created and sent to administrator.

Altered report can be downloaded from RE database.

CamJam works with a wide range of versatile gadgets.

www.mslivestream.com

Drawbacks

CamJam application won't work without the Internet.

Camera will set aside greater opportunity to impair with Poor web association.

Quick web association require initiating or, on the other hand, deactivate the camera rapidly.

CamJam application will set aside greater opportunity to push ready warning to the administrator with poor web association.

Incorporation with RE representative framework:

In fact, we have to make benefit in existing RE participation database. There will be committed site & database which could deal with all the swipe in & out data. Server the group need to make web administration to acknowledge user input(name, representative id, versatile no & status) from cam stick application which will be approved by existing server what's more, put away it in the database.

In view of this, server group can track user camera debilitated or, then again not.
